Loro de nuca amarilla
Amazona auropalliata

White-bellied Chachalaca
Chachalaca Vientre-blanco
Oreotyrus leucogastra

Yellow-winged Cacique
Cacique Mexicano
Cassiculus melanicterus

Guatemala has seven main ecosystems, referred to as biomes by Luis Villar Anleu (1998). These biomes correspond to geographical areas with varying altitudinal and precipitation ranges, supporting diverse vegetation and bird assemblages. Guatemala also has the highest number of regional endemic bird species in Central America.

This guide highlights 52 emblematic and regionally endemic bird species, organized by the ecosystem in which they thrive, though some species are not exclusive to a single ecosystem.

Guatemala tiene siete ecosistemas principales, denominados biomas por Luis Villar Anleu (1998). Estos biomas corresponden a áreas geográficas con diferentes rangos altitudinales y de precipitación, que sostienen una vegetación diversa y comunidades de aves. Guatemala también tiene el mayor número de especies de aves endémicas regionales en Centroamérica.

En esta guía se destacan 52 especies de aves emblemáticas y endémicas regionales, organizadas según el ecosistema en el que habitan, aunque algunas especies no son exclusivas de un solo ecosistema.

- 1 Tropical Humid Forest
Selva Tropical Húmeda
- 2 Tropical Rain Forest
Selva Tropical Lluviosa
- 3 Cloud Forest
Selva de Montaña
- 4 Dry Scrub
Chaparral Espinoso
- 5 Mountain Forest
Bosque de Montaña
- 6 Subtropical Humid Forest
Selva Subtropical Húmeda
- 7 Tropical Humid Savannah
Sabana Costera del Pacífico

Guatemala invites you to explore the beauty of its feathered treasures.

Immerse yourself in an unforgettable birding adventure and experience the true essence of nature!

Guatemala le invita a descubrir la belleza de sus tesoros emplumados.

¡Sumérjase en una aventura inolvidable de avistamiento de aves viviendo la verdadera esencia de la naturaleza!
